

Takeway T1 Clampod

Designed for use with cameras, off-camera flash, smart phones and tablets

The Takeway T1 clampod weighs just 200g, yet the maximum load capacity of the clamp body is 40Kg. The clampod is made of aerospace grade aluminium alloy, making it both lighter and also stronger than many other products. The clampod is supplied complete with a ball head that has a maximum load capacity of 3kg - users can also install a ball head of a higher grade for higher load capacity.

The T1 Clampod can be clamped at any angle and also stands by itself. It can be used in many different places and allows you to take a unique selfie in any location.

The main body is made of aerospace-grade aluminium alloy, which allows it to be lightweight, small and portable - whilst still maintaining a great clamping power. The high load capacity increases its convenience of operation. It is easy to use and very stable - you will no longer have the problem of achieving the desired shooting angle.

The Takeway T1 Clampod is supplied with a 3 Year warranty please visit the website for Terms & Conditions.

<p>The T1 Clampod is equipped with a light ball head and a quick release plate, allowing you to use most digital cameras and DSLRs. The ball head is stable and strong, with a maximum load capacity of 3kg. You can also install a ball head of a higher grade for a higher load capacity.</p>		<p>Most standard cylinders can be clamped with the inner jaw – it can clamp on cylinders whose diameter is between 16mm and 30mm.</p>	
<p>The cubic 'jaw' tip offers a rotatable tip with three different sides: X side, smooth side, and cubic. You can choose the appropriate side for different surfaces to make clamping easier and more stable. You can attach your electronic products securely and easily, even on an irregular surface.</p>		<p>A smartphone holder is supplied with the Clampod - compatible with iPhone, Galaxy (S1, S2, S3), Galaxy Note (1, 2, 3), HTC ONE etc. On the back & side of the holder, there is a screw hole compatible with most cameras.</p>	 <p>(Optional accessory)</p>
<p>The ergonomic disc handle is made of soft plastic and is precise and simple to use, allowing the user to screw in the clamp quickly and easily.</p> <p>The removable base gives a firm support when the clamp is used in the standing position. It is also easy to store when not in use.</p>		<p>A pouch is also supplied with the T1 Clampod kit.</p>	

The following optional accessories are also available:

Smartphone holder for Sports

T-PH02 is a smartphone holder for dynamic use – such as motorcycles, bicycles, scooters, skateboarding etc. Even with violent shaking, a smartphone will not easily fall out. It is designed for smartphones from 4” to 5.7” in size.

Tablet holder

The optional tablet holder T-TH01 is compatible with tablets from 7” to 10.2” - such as iPad, Note 10.1 etc. A screw hole is at the back of the holder. You can adjust the size of the holder according to your needs. The stored holder is only 15 cm x 6.4 cm, the max opening for tablet width is 20cm.
